Brand New Miyano Machines Under Power!

[BNX-51MSY \(video\)](#)

Miyano Reinvented

The single-turret 2" barfed machine with two-turret, **[simultaneous machining](#)** capability.

[BNE-51MSY \(video\)](#)

Increase Capability

This twin-turret allows for 3-tool simultaneous machining, eliminating secondary operations.

**Also Under Power: Citizen Models L20-VIII w/Laser, L32-XII, MC-20, M432-VIII
Miyano Models BNA-42GTY & BNJ-51SY6**

WinTS: Guaranteed to Increase Sales Opportunities

Don't miss an exclusive presentation on the benefits of using WinTS time study software to improve quoting. As machines get more complex, their processes become equally complex, making it difficult to create accurate time studies for a given part. WinTS can be used with all CNCs to create accurate time studies.
